PROFESSIONAL SUMMARY

Final-year Applied IT student who builds mobile apps with Flutter and Firebase and Java systems with data structures and algorithms. Delivered 5 projects, including a Java system built with 6 data structures in a team of 4, and a portfolio site published on GitHub Pages. CodeAlpha Frontend Development intern and Hacktitude 2025 hackathon participant, seeking a junior developer or internship role.

TECHNICAL SKILLS

Languages: Java, Dart, JavaScript, HTML, CSS
Frameworks and platforms: Flutter, Firebase
Computer science: Data structures and algorithms (graphs, BFS/DFS, linked lists, stacks, queues, AVL trees, hash tables)
Tools: Git, GitHub, GitHub Pages, responsive web design
Spoken languages: Tamil, English, Arabic, Sinhala (basic)

PROJECTS

House of Sulafa Fashion Store Mobile App | Flutter, Dart, Firebase — Demo: youtu.be/9hWwJYEmiTU

- Built a fashion store mobile application in Flutter with Firebase as the backend.
- Recorded and published a full project walkthrough video on YouTube.

University Student Record and Campus Route Management System | Java, team of 4 — CIT300 module

- Built a Java console application that manages student records and models campus locations as a graph, combining 6 data structures: linked list, stack, queue, AVL tree, hash table and graph.
- Implemented the graph, campus locations and connections, and BFS/DFS route traversal. Worked with 3 teammates on integration, testing and documentation through GitHub.

Emergency Hospital Management System | Java, data structures and algorithms — Source on GitHub

- Developed a Java application that manages hospital emergency cases using data structures and algorithms.

Calculator (CodeAlpha) | HTML, CSS, JavaScript — Live demo on GitHub Pages

- Built a responsive calculator with 4 operations, decimals, percent, clear/delete and full keyboard support, with error handling for division by zero.

Personal Portfolio Website | HTML, CSS, JavaScript — Live on GitHub Pages

- Designed and published a responsive portfolio with dark mode, scroll animations, project and certificate sections, and a downloadable CV.

EXPERIENCE

Frontend Development Intern | CodeAlpha — 2026

- Building 2 web projects, a calculator and a portfolio, with HTML, CSS and JavaScript. Each is published on GitHub with a live demo and a video walkthrough.

Participant, Hacktitude 2025 Hackathon | ICST University Park — 28 to 30 April 2025

- Took part in a 3-day internal hackathon run by the ICST Industrial Linkage Unit. Received a Certificate of Participation.

Mentor, Personality Development Workshop (5 days) | Sri Lanka Jamaath-e-Islami — 2025

- Mentored participants during a 5-day workshop. Received a Certificate of Appreciation.

Part-time Worker | ABM Group (Pvt) Ltd

EDUCATION

Bachelor of Applied Information Technology | Sri Lanka Technology Campus (SLTC) — 2024 to present, final year

Higher National Diploma in English | SLIATE, Sammanthurai — 2025 to present

G.C.E. Advanced Level and Ordinary Level | Akkaraipattu Muslim Central College — O/L English: A

CERTIFICATES

Certificate of Participation, Hacktitude 2025 (ICST) | Certificate of Appreciation, Personality Development Workshop | Building Career Skills, Merit Pass (2019) | Sinhala Language Course (2019)
